EDUCATION

Hebei University of Technology

China | Sept. 2023-Jun. 2027

Major: Internet of Things Engineering

Average Grade:88.37/100

Main Courses: Applied Programming; Object-Oriented Programming; Sensor Technology and Applications; Algorithms and Data Structures; Operating System; Computer Network; IoT Communication Technology; Systems Analysis and Modelling

Massey University

Auckland, New Zealand | Feb. 2024-Jun. 2027

Major: Computer Science

PROFESSIONAL EXPERIENCE

Tianjin Nansu Technology Co., Ltd

Tianjin, China | Feb. 2021-Present

Technical Co-founder (Part-time)

- Led early-stage architecture planning and solution deployment;
- Built IT infrastructure and ensured stable multi-user office/warehouse systems;
- Maintained production equipment and upheld operational continuity;
- Procured, integrated, and optimized computing systems;
- Developed 3D models and UE4-based games for tech validation and demos.

China Petroleum Pipeline Engineering Corporation Tianjin Branch

Tianjin, China | Jan. 2026-Feb. 2026

Intern, Electrical Design Position

- Assisted in the design of power distribution system schemes;
- Drew with CAD/EPLAN software, and sort out project documents.

Tianjin Engineering Vocational Technical College

Tianjin, China | Feb. 2025-Jan. 2026

Assistant Lecturer (Part-time)

- Assisted in teaching C and Java programming classes;
- Graded homework, guided lab sessions, and answered student questions;
- Helped organize course materials and provided general classroom support.

Digital Intelligence Technology Company of Dagang Oilfield (News & Culture Center) Tianjin, China | Jul. 2025-Aug. 2025

Operations and Maintenance Intern

- Assisted in the daily Q&M of business systems, including troubleshooting, status recording, and performance monitoring;
- Conducted equipment and network inspections, collected data, and reported potential risks;
- Learned O&M tools, and assisted in system updates, patch installation, and configuration optimization;
- Supported the team in data backup and recovery testing to ensure the security and traceability of key information.

ACADEMIC EXPERIENCE

Design of A Low-Power Human Activity Recognition System with Multi-Sensor Fusion Based on ESP32-S3

Team Leader

Jun. 2025-Present

- Designed system architecture, sensor fusion strategy, and data processing workflow;
- Developed embedded firmware (C/C++, Arduino/ ESP-IDF);
- Implemented HAR algorithms and performed experimental analysis.

Low-Cost Visual Obstacle Avoidance System Based on Lightweight Object Detection

Jun. 2025-Present

Individual Project

- Trained and optimized the YOLOv5 lightweight object detection model;
- Deployed the model to edge computing devices and integrated it with MCU-based ToF triggering;
- Participated in system integration and performance testing.

EXTRA-CURRICULAR ACTIVITIES

Head, E-sports Club, Hebei University of Technology

Jul. 2024-Present

- Managed daily club operations, event planning, and member coordination;
- Organized multiple large-scale e-sports events (on/off campus), including logistics and on-site execution;
- Led the team and delegated cross-department tasks.

Member, China International College Students' Innovation Competition

Jun. 2025-Jul. 2025

- Contributed to project ideation, solution design, and prototyping; handled technical implementation and documentation;
- Assisted with market research and feasibility analysis, and participated in final presentation and defense.

Member, China International College Students' Innovation Competition (International Division)

Jun. 2025-Jul. 2025

- Competed alongside teams from multiple countries, engaging in cross-cultural communication and collaboration;
- Refined technical details of the project and enhanced the international appeal of presentations.

Member, iCAN International College Students' Innovation & Entrepreneurship Competition (Innovation Track)

Jun. 2025-Jul. 2025

- Designed innovative features and implemented functional prototypes;
- Collaborated with the team on solution optimization and pitch rehearsals.

Member, Student Union of Hebei University of Technology

Jul. 2023-Sept. 2024

- Planned and executed campus events, festivals, and orientation; coordinated resources to ensure smooth delivery;
- Resolved cross-department communication and on-site contingencies.

ADDITIONAL SKILLS

- Technical Skills: C, C++
- Languages Competence: Chinese (native); English (fluent) with an IELTS overall of 6.5
